Re: Docket Nos. 98N-1230, 96P-0418, 97P-0197

Dear Sir or Madame:

The most effective and direct way to reduce salmonella in eggs would be to eliminate the practice of forced molting. You need to do more than put warning labels on egg cartons and regulate egg refrigeration temperatures. A more aggressive approach to end forced molting would greatly help reduce this disease.

Thank you.

Sincerely,

Kady Lane
